

TAGGING :

Note: Coil hook-up drawings are provided as a service by IMI Flow Design. These Drawings are a visual representation of our interpretation of possible coil configurations. They are not based on specific engineering requirements and IMI Flow Design is not responsible for orders placed using unverified drawings. The purpose of IMI Flow Design hook-up drawings is to show a "plan view" of the components comprising the coil hook-up rather than an exact "as-built" layout.
